## **DETAILED ACTION**

### ***Response to Amendment***

The applicant's amendment, received 1-8-2008, overcomes the examiner's rejection. Hence claims 21, 26-33 and 38-49 while claims 1-2, 22-25 and 34-37 have been cancelled.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

1. The applicant has amended as per the recommendations of the examiner.

Hence he believes the claims to be novel over the prior art of record.

2. The examiner believes novelty is found in the fact that the programming of the phone uses a Location Function/Message, a non-valid MIN number and distinguishing the message via an over the air activation Function ID number for the process.

“..An unactivated mobile station programmed to perform a method comprising: sending, to a wireless communications network, during a process that can be used by an activated mobile station to announce a current location of the mobile station and enable the wireless communications network to direct incoming calls to the activated mobile station, a message not including a valid mobile identification number, the message comprising information distinguishing the message as for activation of the unactivated mobile station, wherein the sending of the message causes the network to send activation parameters to the unactivated mobile station, and wherein the information distinguishing the message as for

Art Unit: 2617

activation of the unactivated mobile station comprises an over the air activation function ID number; and receiving the activation parameters sent from the wireless communications network responsive to the message comprising the information distinguishing the message as for activation of the unactivated mobile station”.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
